Your Digital Gateway To Exclusive Mail Services

Intelligent mailing with one-touch convenience – that's what IntelliLink™ Technology delivers. You'll gain access to a suite of services and management information that will improve the productivity of your mail center and the performance of your business. Imagine the benefits.

• **USPS & Carrier Payment Solutions** – One-touch, online postage replenishment is easy and fast through our Postage By Phone® System. You can Pre-Pay for postage, you can get a Postage Advance, or you can earn interest on the balance maintained in your Reserve Account. Also, our new, Carrier Billing Service enables FedEx customers to enjoy flexible payment terms.

• **Features On-Demand** – Are you starting a new ad campaign, postage chargeback policy, or a new USPS service? You can instantly download Envelope Ads, Departmental Accounting options, and Postal Inscriptions – all at a touch of a button.
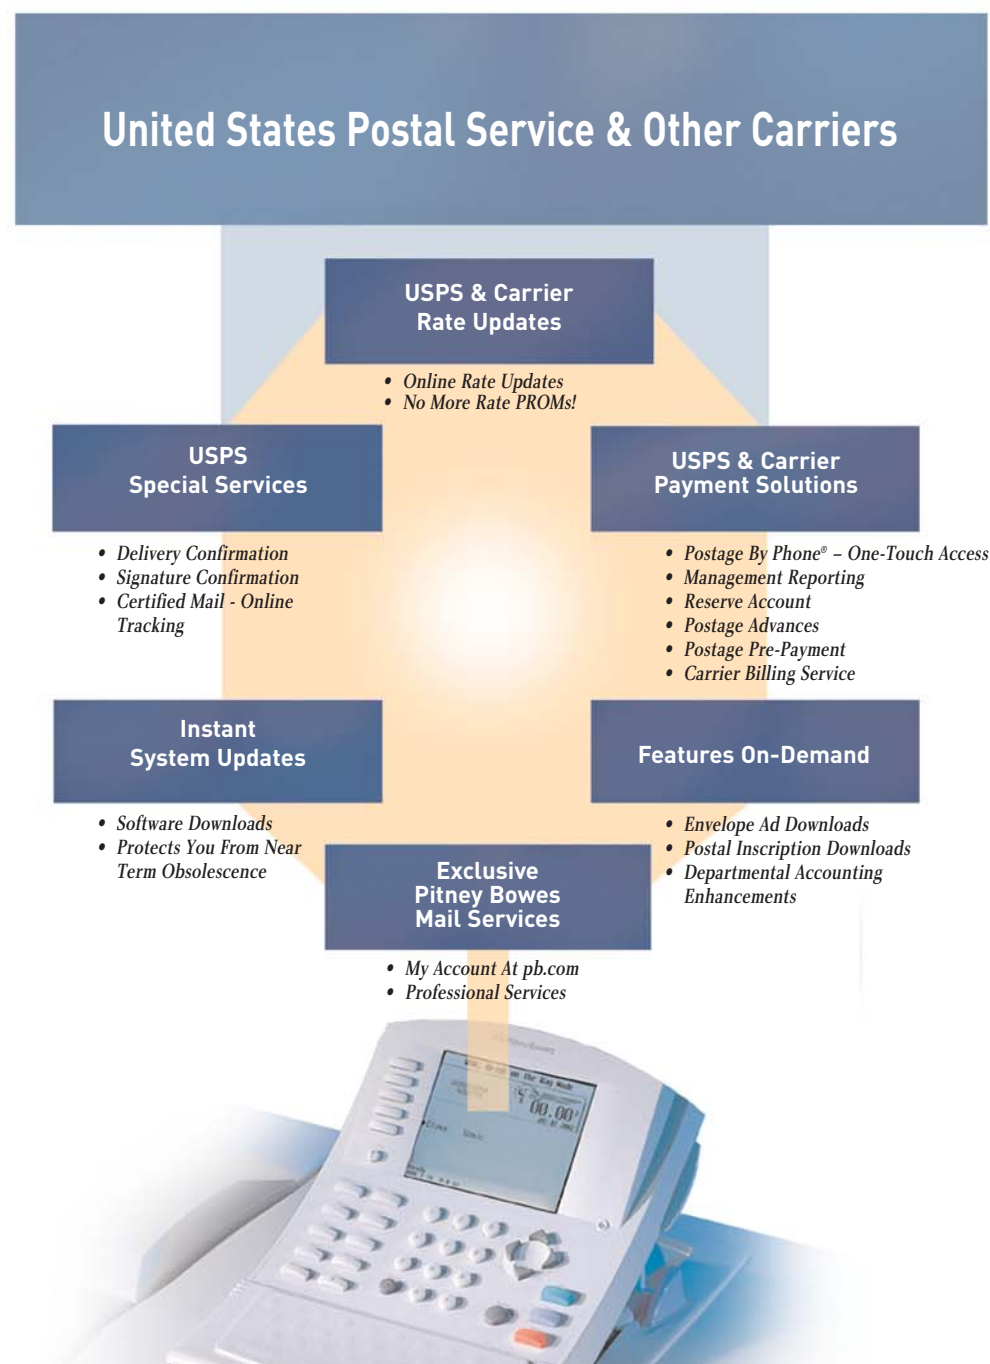

• **Exclusive Pitney Bowes Mail Services** – "My Account" at pb.com provides online access to your account information, enables you to order supplies, and even request service. And, our Professional Services ensure the peak performance of our equipment solutions.

• **Instant System Updates** – IntelliLink maintains your operating system with the latest software downloads. This ensures maximum performance and protects you from near-term obsolescence.

• **USPS Special Services** – Enjoy and profit from online Delivery Confirmation and Signature Confirmation for First Class Parcels, Priority Mail and Package Services. Plus, IntelliLink even enables you to process and track Certified Mail – again online.

• **USPS & Carrier Rate Updates** – No more rate PROMS! Just download the new rates when you need them.

How IntelliLink™ Technology Works

Just connect your IntelliLink™ Control Center to an analog phone line, and you are automatically linked to our dedicated, Pitney Bowes Server. This server is always on duty, and it remains connected with the USPS and other carriers. This ensures that your DM Series Mailing System keeps current; and you stay linked for postage funds, USPS Special Services, software updates and more. In addition, through your PC our other Exclusive Pitney Bowes Mail Services are available when you need them.

Every mail service and productivity function you could need is at your fingertips. There's no interruption to your operations, and no service installation is required. IntelliLink Technology will bring your mailing operation into a new era of productivity.

DM900 Specifications

Dimensions
• Size: Length: 45", Width: 22 1/2", Height: 17"
• Weight: 137 lbs. (62.5 kg)

Electrical
• Operates on 100 - 240 VAC, 50/60 Hz, 6.5 amps max. plus 3.0 amps max. accessory outlet.
• UL and CSA Approvals
• ENERGY STAR® Compliant

Speed
• DM900
  - Up to 240/lpm (W-O-W off)
  - Up to 110/lpm (W-O-W on)

Envelope and Card Sizes
• Length: 15" max. to 5" min (13" max. when using W-O-W™)
• Width: 13" max. to 3.5" min. (10" max. when using W-O-W™)
• Thickness: 3/4" max. to .007" min.
• Width of Flap: 4" max. to 1" min.

Connectivity Requirements
• Connects to a standard analog phone line.
• Supplied installation kit includes phone line splitter and six foot phone cord.
• IntelliLink™ Control Center easily detaches to simplify connections.

• Auto-Dating
• Multiple Tapes (1-99)
• Low Postage Alert
• High Value Protection
• Original Value Resetting
• Sealant Level Indicator

• Seal Only And No Seal Modes
• Low Ink Alert
• Password Security
• Standard Envelope Advertisements
• Standard Postal Inscriptions
• Maximum Thickness Warning

We Guarantee Your Satisfaction

At Pitney Bowes, we are committed to providing our customers with the finest products backed by the highest quality service, and we won't be satisfied until you are satisfied. Ask your sales representative for more information about our Customer Satisfaction Guarantee.

Our Service Professionals Are Ready When You Need Them

If you need service, our nationwide network of 2000 trained Pitney Bowes service professionals is ready to help. Our Computer Enhanced Service Management System lets us record your request, instantly call up a complete history of the equipment, and quickly dispatch a local Customer Service Representative with the right skills.

System pictured above includes the optional Console and Drop Stacker. Both of these features help to maximize productivity.

Mailing System
DM900™ with IntelliLink™ Technology

A New Standard For High Volume Mail Productivity

The DM900™ Mailing System — Higher Productivity And Easier To Use Than Anything In Its Class

- **Streamlined Processing** – The DM900 is able to meet the demands of even the highest volume mailers. By automatically feeding, sealing, imprinting postage and stacking up to 240 letters per minute, this system gets big jobs completed quickly and efficiently.

- **Mixed Mail Feeding** – The DM900 handles mail ranging in size from post cards to 10"x13" flats and up to 3/4" in thickness – intermixed in a single stream. This maximizes operator productivity by minimizing the need to sort by size.

- **Advanced Detection Sensors** – These sensors are located throughout the feeding and transport path, and they automatically align the mail to protect its contents while ensuring precise postage imprinting. In addition, the sensors enhance the processing of difficult materials like post cards or "dark mail".

- **Weigh-On-The-Way Technology** – This patented technology maximizes efficiency by processing mixed weight material up to 16 oz. – automatically and in a single operation. Each piece is weighed, the proper rate is calculated, and the postage is imprinted at speeds up to 110 letters per minute.

- **Perfect For Any Environment** – Whisper quiet operation (only 64 dba) and stylish design make the DM900 a perfect fit in virtually any environment – from a dedicated mail center to an office setting.

- **Built To Last** – Advanced engineering has produced a machine with more capabilities but fewer moving parts. With fewer components to wear, the DM900 is designed to deliver long term, reliable operation.

The IntelliLink™ Control Center Makes Operation Easier Than Ever

- **IntelliLink™ Control Center** – All of the system's functions, including updates, are activated and controlled from a single point. This makes the operation easy – even for the casual operator.

- **Simplified Rating** – All rate selections are made through the IntelliLink™ Control Center and updated automatically . The DM900's weighing options always include both USPS Domestic and International rates.

- **Easy To Read Prompts** – These clear instructions guide even the most inexperienced user through the steps needed to get the mail out.

- **Job Presets** – The system can be programmed to handle up to 10 routine jobs. This enables even inexperienced personnel to easily run applications that are stored in memory.

IntelliLink Control Center offers ease of use and access to services

Digital Technology Provides Unequalled Flexibility!

- **Sharp Digital Printing** – The inkjet printing process creates crisp, razor-sharp images. No more broken imprints due to unevenly filled envelopes.

- **USPS Compliant** – Using the latest digital technology, the DM900™ is fully compliant with USPS requirements for secure postage printing.

- **Envelope Advertising** – You can print a special message on every envelope you mail with your choice of downloadable envelope ads.

External Weighing Options Deliver Even More Productivity And Savings

- **Interfaced Weighing Platform** – Configure the best system for your applications by choosing from our optional 15, 30, 70 or 149 lb. capacity platform scales. Each one delivers guaranteed, electronic accuracy.

- **Full Postal Rating** – While domestic and international postal rates are standard with the DM900, you can also add the data for FedEx, UPS, Airborne and DHL. This enables you to compare the rates, and choose the service that is best for you.

- **Differential Weighing** – This feature gives you maximum flexibility by allowing you to process mixed weight mail pieces and parcels together in the same run. There are just two simple steps:

Step 1 – Place your mail pieces and parcels on the platform. As you remove a piece, the system calculates the appropriate postage (based on the weight removed from the stack) and displays it on the Control Center.

Step 2 – Feed envelopes through the DM900 or press the tape button for parcels. The correct postage is then imprinted, and the piece is ready to go.

Accounting Functionality Can Transform Your Mail Center Into a Profit Center

- **Accounting Options** – The DM900 gives you virtually unlimited accounting options. You can take advantage of the system's internal storage capacity for up to 300 accounts, and you can even interface it with a PC and Report Printer. Now you can monitor, track, store and report every cent spent on postage, making your mail center a tightly controlled, profit oriented operation.

- **Integrated Keyboard Saves Steps** – The keyboard within the IntelliLink Control Center manages all accounting and report selections. This simplifies the data entry process and thereby increases productivity.

Other Productivity Enhancing Features

- **Optional Power Stacker, Console And Barcode Scanner** – The stacker maximizes your throughput, the console provides convenient access to stored mailing supplies, and the scanner speeds tracking and accounting. All these options can contribute to increasing the productivity of your mailing operations.

- **Dual Tape Capability** – Hassle free Drop-In Roll Tape, a standard feature, accommodates either gummed or pressure sensitive tape. This enables you to apply tape to virtually any material.

Drop-In Roll Tape – It's quick and easy to replace and dispenses cut-to-size tapes – either gummed or pressure sensitive.

Auto-Sensors automatically align mail for perfect imprints

Ink Jet Printing minimizes disruption due to noise

Optional Power Stacker for optimum productivity

Mixed Mail Feeding enables automatic feeding of various sized pieces

Tip-To-Tip Sealing of open flap envelopes protects the contents from damage or loss

Weigh-On-The-Way (W-O-W) eliminates sorting by weight
