

centormail™

DIGITAL MAILING SYSTEM

THE ONLY DIGITAL MAILING SYSTEM IN THE MARKETPLACE THAT VERTICALLY WEIGHS AND PROCESSES MAIL – WITHOUT PRESORTING – SO LARGE, BULKY PACKAGES WON'T SLOW YOU DOWN

FROM POSTCARDS TO LETTERS, EVEN FLATS AND PARCELS – THE **centormail™**
CAN PROCESS ALL OF YOUR MAIL REGARDLESS OF FORMAT

The **centormail™** exclusive vertical transport design handles catalogs and other bulky mailings with ease. It offers the widest pass-through in the industry – nearly 1" – so oversized mail and #10 envelopes are processed with the same efficiency. And the modular design of the **centormail™** system means that, as your business grows, **centormail™** will be up to the challenge. Choose from a number of optional components that will increase productivity and save money. From postcards to bulky boxes; whatever your postage needs, **centormail™** can handle each and every task.

KEY ADVANTAGES

HANDLES PACKAGES AS QUICKLY AS YOU CAN STACK THEM

The exclusive vertical feeder handles all your mail – up to 140 letters per minute! It's perfect for large and bulky mailings up to nearly one inch thick. And, the vertical envelope transport draws from a stack and meters letters in every format – from standard postcard to 10"x14" letter sizes.

EASY TO USE, HARD TO HEAR

A clearly designed backlit user interface and intuitive soft key operation guides the user quickly and confidently through all machine functions and registers. View all relevant settings on one screen: from the calculated postage to a graphic depiction of the selected advertising slogan to remaining available postage. Letters glide past the print head with minimal contact for whisper-quiet operation. It's engineered to work quietly, which allows you to set up the system anywhere in your office without disturbing co-workers.

INTERFACE TO ACCOUNTING AND SHIPPING SOFTWARE

Unlimited cost accounting reporting capabilities to conveniently manage and evaluate postage used to generate reports.

EVERYTHING YOU NEED TO WEIGH AND RATE YOUR MAIL

The integrated scale calculates postage rates for larger pieces. It weighs the letter, calculates, and displays the correct postage. For oversized packages, print the meter on an adhesive label delivered by the integrated label dispenser.

RELOADING POSTAGE IS FAST AND EASY

The entire postage reloading process runs automatically with the touch of a button. The integrated modem instantly downloads postage funds through the FP **teleset**™ data center.

ENHANCES YOUR COMPANY'S IMAGE

Custom messages and graphics let you add greater personalization. In addition to printing a company logo or advertisement (memory for up to 15 images), centormail can also print a short, tailored message on the envelope – up to 5 lines, over 30 characters per line.

centormail™

DIGITAL MAILING SYSTEM

- **True Mix Mail Processing** – No presorting of mail required.

- **External Scale Interface** – Capability of up to 150 lbs. allows for expanded convenience.

- **Vertical Feeding** – Perfect for catalogs and other bulky mailings, featuring the widest pass-through (nearly 1") of any mailing system in the industry.

- **Envelope Moistener** – Pre-moistens envelopes for immediate sealing.

- **Dynamic Scale Weighing** – Automatically calculates the weight of mail pieces without a break in the process.

SPECIAL FEATURES

- Extended Feeder Deck Option
- Envelope Conveyor-Stacker Option
- Backlit LCD Display
- Incoming Mail Mode
- Interfaces with Shipping and Accounting Software
- Vertical Envelope Transport
- Integrated Label Dispenser
- Optional 15 lb. Integrated Scale
- Envelope Exit Tray
- Integrated Modem allows 24/7 Postage Download via tele**set**™
- Convenient Storage Bins
- In-Line Dynamic Scale Option
- Power Sealer
- Extended Departmental Accounting
- SBP (Shape-Based Pricing) Compliant
- IBIP (Information-Based Indicia Program) Compliant
- HP Technology Inkjet Delivery System

- **Automatic Label Dispenser** – Easily prints quick postage labels.
