50 Years With The National Cash Register Postage Meters

Author
Dr. Frank Shively

Donated: April 4, 2011
Mounted: April 7, 2011

Copyright Statement:
This exhibit has not been copyrighted by the author. However, all materials in possession of the Meter Stamp Society may not be used verbatim or sold without express written permission.
On August 5, 1930, the USPOD authorized the NCR Corporation to produce taped meter stamps for use on Parcel Post Mail.

The Class 1900 Register was initially used at the home office in Dayton, Ohio on January 17, 1931.

Domestic and Foreign acceptance of these meter machines and stamps resulted in their use on all classes of mail.

In the 1960-1970 decade, corporate competition demonstrated that mechanical stamp production had entered The Electronic Era.

The NCR Company responded by authorizing a subsidiary, The Electronic Communications, Inc., Flushing, N.Y., to manufacture on trial "an electronic meter stamp device." The "Pilot Trial" stamps appeared on August 8, 1974 and were discontinued in late 1981.

Featured characteristics, rates, and usages of the stamps in North America and Foreign countries are displayed in the Exhibit.

BLUE DOTS indicate the Rarity Factors.

There are three short horizontal lines to each lower corner at the sides of the town name. The line above the town name does not extend to the sides. Sanserif inscriptions. Meter number is large in size.

HISTORICAL BACKGROUND

The NCR Company was the first to produce a key-numbered, self-service, coin operated meter device to print and sell adhesives for application to a postal item by the purchaser.

In early 1971, one such machine was placed in the AUSTIN, TEXAS Post Office. It was contained in a cabinet five feet tall by two feet wide and was used a few months for Parcel Post needs.

A limited number of stamps are known, mint and used.
THIS ENVELOPE IS KNOWN AS THE "JACK BIRL" COVER

11¢ Airmail Rate (1971-1973)

Eighth Design

AUSTIN, TEXAS
MAY 1971

NCR METER 0001

AIR POSTED
AUSTIN, TX TO
MILLSBORO, DELAWARE 19966
The company manufactured the initial computerized omni-denominational Postage Accounting Systems and Stamps.

These devices were introduced on a trial basis, at the Flushing, NY (BAR TERRACE) Post Office, August 8, 1974. The "Pilot Program" was terminated in 1981.

Subsequent electronic circuitry produced the present day Integrated Retail Terminals (IRTs) and Postage Validation Imprinters (PVIs).

The following stamps represent the precursors of the IRT/PVI labels in use at modern Post Office window operations.

**STAMP DESIGN**

"U.S. EAGLE" placed at left.
"U.S. POSTAGE, TOWN NAME, STATE, AND ZIP CODE" are located at right.
NCR Meter, Number, Date, and Value placed at bottom of stamp.
Imprints were made on thin 'white' adhesive paper in shades of violet and purple inks.
Outer 'Frame Line', rounded (1976), squared (1978). UL/UR.
INDICIA is fluorescent.

**PROJECT PROFILES**

Two Letter/Number types were printed: (1) Large (3.0 mm), and (2) Small (2.5 mm).

"NCR" 1.0, 1.5, 2.0 mm
"VALUE" 1.5, 2.0 mm
"METER NUMBERS, DATE, VALUE" 2.5, 2.75 mm
Memorandum - POST OFFICE DEPARTMENT

SUBJECT: New NCR Terminal Indicia Machines

DATE: 2/24/75

IN REPLY

FROM: Anthony DeStefano
Manager Administrative Services
Flushing, N.Y. 11351

TO: Gabriel Fustel
34 Laurelton Ave.
Jackson, N.J. 08527

In reply to your letter of 2/12/75, the following information is furnished you in regard to the NCR Terminal's now being used in the Flushing area on a pilot basis.

First Post Office was Pay Terrace, 8/8/74, 20 stations, 18 carrier stations and 11 Finance Stations. 54 Terminals are in operation, each station has an assigned number, tapes are not luminous of phosphorescence and the local NCR is in Rego Park, N.Y. 11374

Enclosed you will find one tape with my compliments because zero tape is issued, a sale has to take place because of the possible volume of Philatelic collector's involved.

The USPS handles mail in many ways. Four classes are utilized. Post and Postal Cards, Domestic Letters, and Air Mail are handled in the First Class manner. Second Class mail is applied to publications printed at regular intervals at least four times a year. Third Class mail contains material not required to be posted at First or Second Class restrictions. Fourth Class mail is used for Parcel Post with defined variations.

Special Delivery, Registry/Insured, Return Request, and Restricted Delivery are included in these categories. Additionally, Third and Fourth Class mail is used with Insured and C.O.D. pieces and parcels.

The NCR Stamps and Usages (1931-1981), Domestic and Foreign, Surface and Airmail, are verified on the following pages.

NCR METER 1905
On May 15, 1947, the 113-foot wide Erie Boulevard became one of the eight best lighted streets in America. With 15,000-watt filament lamps and 82 luminaires on two standards in a plane parallel to the curb line, the G-E installation provides 27 average footcandles over the entire street. The previously installed luminous arc lamps provided less than one-fourth as much light.

We just spent an afternoon in the G-E plant. Very interesting. We have some literature for you from the plant.

NCR METER 1024
FORM 3817 initially became available for only fourth-class parcels. The NCR STAMPS dated April 3, 1952 indicate a request and payment by the Sender of the 1¢ Fee (1915-1955) for each lot with no provision for indemnity.

These pieces illustrate "Duplicate Certificates", original and duplicate, that became available on July 1, 1929.

[Image of Certificate of Mailing]

* [PMG ORDER NO. 8977 JUNE 30, 1915; EFFECTIVE SEPTEMBER 1, 1915]
The NCR multi-denominational machines were used in Canada from 1925 to 1973. Initially, two types were used in Post Offices for Parcel Post Mail. Subsequently, they were utilized on letter and Postage Due envelopes.

**TYPE PP.1.**

**CLASS 1100 MODEL** produced Upright Rectangular 28 x 85 mm stamps.

Sub-types PP. 1A, 1B, 1C were used.

**TYPE PP.2.**

**CLASS 1900 MODEL** created Rectangular 54 x 46 mm stamps.

Sub-types PP. 2A, 2B, 2C, 2D were employed.

**POSTAGE DUE**

Machines were available in CLASS 1100 and 1900 Models.

Sub-types PD. 1, 2, 3 have been identified.
