UNPI - UN Personalized Stamps

This United Nations Philatelists project compiles all currently known information regarding the United Nations Postal Administration personalized sheets. The information has been compiled from personal acquisitions and through research and contacts with other collectors, dealers and the UNPA. This project has been updated because of several new issues being released over the last two years and with the discovery of new varieties and errors. Additional information on personalized sheets can be found in the United Nations Personalized sheet blog. This project will be updated periodically as new information becomes available on existing sheets and new sheets as they are issued.

Greetings from the
United Nations

Climate change is one of the most complex, multifaceted and serious threats the world faces. The response to this threat is fundamentally linked to pressing concerns of sustainable development and global fairness; of vulnerability and resilience; of economy, poverty reduction and society; and of the world we want to hand down to our children.

This year we have an unprecedented opportunity to tackle the climate crisis. I urge the world’s governments to seal a deal on a climate change agreement in Copenhagen this December. It must be ambitious, fair and effective in reducing emissions while assuring countries as they adapt to the inevitable effects of climate change.
