M-SERIES

FP's M-Series mailing systems give you the edge you need with easy to use controls and the power of German engineering. Made for the busy mailroom, the M-5000 quietly runs at speeds up to 200 pieces per minute.

Because it handles the biggest jobs, the M-5000 is outfitted with a heavy-duty inking system that efficiently delivers ink with an electronic pump. And, it features a unique internal tape dispenser that allows you to print from 1 to 180 mailing labels with push button ease.

Flexible enough for any mailroom, the M-5000 integrates easily with other FP products depending on your specific needs. You can connect an optional printer for a complete report of departmental accounting information. An optional interfaced electronic scale will set the right postage rate every time. You may choose to include one of two conveyors with your system, depending on the size you require. The CS-1 conveyor/stacker is 20 inches long for standard jobs and the CS-2 is 30 inches long for higher volumes of mail.

Your M-5000 comes with the M-Series postage meter which features all of the high-volume features you require. You get it all, including information on up to 99 accounts with departmental accounting, automatic daily date setting and the convenience of TELESET resetting.

The M-5000 delivers all of the speed, features and efficiency your mailroom requires. Ask your Francotyp-Postalia dealer for a demonstration today.

3.5 Nixdorf Post Office

Nixdorf introduced meters in 1990 that were originally used only in retail postal contract stores. Now these are standard in all Canada Post Offices as well as the retail stores. The meters print the indicia on a label with a laser printer. Canada Post began to provide security labels with silver borders in September 1996 to prevent use of office supply labels.
