

Pitney-Bowes introduces You can do it with

In 1969 the Touchomatic was introduced to replace the older models. Phone-like keypad and the digital readout predicted the coming of the computerized models.

- Large Value Frame.
- French "Postes" and English "Postage" form right and left of Value Frame.
- "Canada" Flat or Curved.

Mr. H. R. Knowles
PMO 107

Touch Control Postage. your eyes closed.

What we did was to shift the responsibility. From your eyes to your fingers. So now your eyes can take a little nap. While they are napping, here is what happens: you go "push-push" (any amount of postage from 1¢ up to \$9.99). Then you place the letter or parcel post tape in position. Kachung! Wake up. Your letter has emerged metered and sealed. Your tape is stamped and ready for the package. It's exactly the right amount of postage, because the meter makes its own stamps (the kind you don't run out of). The postage is accounted for in the meter so you don't have to worry about keeping a record. And there's a little ad for your business right next to the meter stamp. Everything absolutely neat and professional, fast, accurate, refreshingly simple.

The hard part was to invent a totally new kind of postage meter mailing machine for the new kind of businessman—small but sophisticated, simple but effective, something.

Fantastic! We

We apologize

Dear Customer,

The enclosed item of mail was either received in this condition or damaged during its processing. We sincerely regret this unfortunate incident and any inconvenience caused.

We are always concerned when mail entrusted to our care is damaged, and we have made considerable improvements to reduce such incidents in our operations.

Nous vous présentons nos excuses

Cher(e) client(e),

L'envoi ci-joint a été reçu dans cet état ou a été endommagé au cours du traitement. Nous regrettons sincèrement ce malheureux incident ainsi que tout inconfort qui vous a été causé.

Nous considérons toujours comme très importante toute situation où le courrier qui nous est confié est endommagé, et nous avons apporté des améliorations considérables en vue de réduire le nombre d'incidents de ce genre.

500-15-250 (00-11)

Please be assured that we are continuing to
improve our service.
Please keep this bag away from young
children.

Laissez-nous vous assurer que nous
continuons à améliorer notre service.
Mise en garde : gardez ce sac hors de la portée des
enfants.

2.1.2 Sixth Pitney Bowes Maple Leaf

Improved Model 6000 series were reported introduced in 1980 but first examples were not seen until June 1982. The design with wider value frame and the inked perforations became ubiquitous. There are four variations based on the position of the letters "PB" and the width of the triad of wavy lines before the value. Always very hard to find properly printed. The four clear examples here are hardly typical. Decertified by the Meter Migration Mandate December 2006, although a grace period extended some use until June 2007.

Parcelmatic Models

Certain meters could be attached to the Parcelmatic station. This station was designed to weigh all sizes of parcels. These meters were distinguished by four horizontal lines to the left of the indicia. These models were often used for envelope mail as well.

The postage meter with the built-in computer.

The IMS/Hasler Model 307 Postage Meter Line.

2.2 Hasler Square

Hasler, a German company, produces meter machines in Switzerland and has them placed around the world. The meter uses a credit card like card inserted into the meter to determine the cash available and only the card need be taken to the post office.. This was originally rejected in Canada, delaying introduction until December 1981. Hasler has numerous models but the indicia were all the same except for the value.

Regular Meter, KF 1501, Heart of the complete postalia meter system

Basic unit of a completely modular system, this handy, compact, self-contained Postage Meter holds up to \$9,990.00 in one setting, and imprints any amount from 1¢ to \$9.99 *directly* on letters or parcels. Lightweight (weighs only 5 lbs.), the versatile meter is easy to carry to the Post Office for setting.

Simple to set and operate, it is easily interchangeable with all Postalia modular systems as your mailing requirements change or grow.

Electronic Mailing Machine with Automatic Tape, Model EMT

Compact Meter, Model KF 1501/8

This two-digit meter prints an amount from 1¢ to 99¢, and is ideal for the smaller user.

Easily visible ascending and descending registers give you total control of your postage usage.

Manual Mailing Machine, Model HM

This low cost, high value machine moistens, seals, imprints, ejects and stacks your envelopes in one continuous operation. A soft touch on the handy *Flip-Action Lever* and the machine operates smoothly. Extra deep flaps are sealed as easily as special tissue-thin air mail envelopes. A large capacity water reservoir is located outside to prevent inside water damage or leakage. Pressure-sensitive tape can be used for parcel post or the postage meter may be removed and used to imprint directly on parcels or bulky envelopes.

2.3 Postalia Square

Frankotyp of Germany Purchased Postalia 1970. Square indicia designs introduced in the 1980's. "Postalia" with meter number. Townmark separated from the value box, first time in several decades.

 Obsolete: 2002

The set of four lines to the left of the townmark on some prints is printed by a slug occupying the space where an advertising slug could be placed.

Electronically Integrated Mailing and Shipping Systems give you the maximum time and money savings with the minimum of effort.

Automatically cuts costs, eliminates errors and reduces wasted steps.

To give you the maximum money-savings and labor efficiencies from our computing scales, mailing machines, printers and furniture, we've linked them together into totally electronically integrated systems. These systems allow one employee to weight, rate, meter and document in a single operation. Eliminating wasted hours, effort and errors in calculation, transposition and documentation.

Our totally, single source, interfaced systems offer you a large choice of mailing and shipping applications. No matter what size your company or volume of operation, we have a time and money-saving system that can meet your requirements for increased employee morale, productivity and efficiency, plus direct dollar savings.
